GUIDELINES TO BE FOLLOWED IN DEATH CASES

- A. The Coroner or Deputy Coroner having view of the body, shall investigate the facts and circumstances concerning deaths WHICH APPEAR TO HAVE OCCURRED WITHIN THE COUNTY, REGARDLESS WHERE THE CAUSE THEREOF MAY HAVE OCCURRED, for the purpose of determining whether or not an autopsy should be conducted or an inquest thereof should be had in the following cases:
- (1) Sudden death not caused by readily recognizable disease, or wherein a physician on the basis of prior medical attendance cannot properly certify the cause of death.
 - (a) **SUDDEN DEATH DEFINED:** The Coroner shall regard any death as sudden if it occurs without prior medical attendance by a person who may lawfully execute a certificate of death in this Commonwealth, or if, within twenty-four hours of death, the decedent was discharged from such medical attendance or a change of such medical attendance had occurred, or if any such medical attendance began within twenty-four hours of death and the medical attendant refuses or is unable to certify the cause of death. Medical attendance includes hospitalization. (The provisions stated above regarding sudden death shall not be construed to affect the Coroner's discretion as to whether or not any death was suspicious, nor shall they be construed to authorize a Coroner to investigate a sudden death any further than necessary to determine cause and manner of death).
 - (2) Death occurring under suspicious circumstances including those where alcohol, drugs or other toxic substances may have a direct bearing on the death.
 - (3) Death occurring as a result of violence or trauma, whether apparently homicidal, suicidal or accidental (including but not limited to, those due to mechanical, thermal, chemical, electrical or radiation injury, drowning, cave-ins and subsidence).
 - (4) Any death in which trauma (falls or fractures), chemical injury, asphyxia, exposure, fire related, drug overdose or reaction to drugs or medical treatment was a **PRIMARY** or **SECONDARY**, **DIRECT** or **INDIRECT**, **CONTRIBUTORY**, **AGGRAVATING** or **PRECIPITATING** cause of death.
 - (5) Operative and peri-operative death in which the death is not readily explainable on the basis of prior disease.
 - (6) Any death wherein the body is unidentified or unclaimed.
 - (7) Deaths known or suspected as due to contagious disease and constituting a public health hazard.
 - (8) Deaths occurring in a prison or penal institution or while in the custody of the police.
 - (9) Deaths of persons whose bodies are to be cremated, buried at sea or otherwise disposed of so as to be thereafter unavailable for examination.
 - (10) Any sudden, infant death.
 - (11) Stillbirth.
 - (12) **ALL** emergency room deaths, and deaths occurring at a medical facility within less than 24 hours of admission; and residential deaths unless the decedent is under hospice services for a death occurring from a natural etiology.
- B. The purpose of an investigation shall be to determine the cause of any such death and to determine whether or not there is sufficient reason for the Coroner to believe that any such death may have resulted from criminal acts or criminal neglect of persons other than the deceased.
- C. **UNCLAIMED BODY** – Hospitals, nursing homes and personal care homes are required to contact the Humanity Gifts Registry as soon as they realize they have an unclaimed body, but not longer than 36 hours after the death. The County will not accept an unclaimed body because the healthcare or personal care facility failed to notify Humanity Gifts Registry on time and failure to do so makes that facility responsible for all arrangements for the disposition of the remains.
- D. In all cases where the Coroner has jurisdiction to investigate the facts and circumstances of a death, **THE BODY AND ITS SURROUNDINGS SHALL REMAIN UNTOUCHED** until the Coroner or Deputy Coroner has had a view thereof or until he shall otherwise direct or authorize (Section 120, County Code, Amended 11/29/90, P.L. 602, No. 152) and the laws of the Commonwealth provide that the Coroner shall take custody of all personal effects which appear to have been **ON** or **ABOUT** the person at the time of death until lawfully claimed by proper persons. Care should be taken in gathering of these effects in order to facilitate identification of the deceased and further any police investigation that may be in progress.

Pennsylvania Coroners' Education Board

The Pennsylvania Coroners' Education Board, housed in the Office of Attorney General, provides the Basic Education Course which all newly elected coroners are required to attend prior to assuming office. The chief deputy and full-time deputies are required to attend the Basic Education Course within six months of appointment. The board also authorizes courses that are acceptable for fulfillment of the eight credit hours of continuing education required annually of all coroners and deputies.

Pennsylvania State Coroners' Association

The object of the PSCA is to hold meetings for the purpose of discussing the various questions which arise in the discharge of the duties of the office of the coroner, and for such other purposes as will conduce to greater efficiency of the operation of the office of the coroner. Additionally, the PSCA holds an annual conference and education seminar addressing various topics, questions, and current events for the coroner's offices located throughout Pennsylvania. The coroner, and all deputies are members of the PSCA.

American Board of Medicolegal Death Investigators

Coroner Howell passed the registry examination in 2020, and has diplomate status of the ABMDI.

The American Board of Medicolegal Death Investigators (ABMDI) is a voluntary national, not-for-profit, independent professional certification board that has been established to promote the highest standards of practice for medicolegal death investigators.

ABMDI certifies individuals who have the proven knowledge and skills necessary to perform medicolegal death investigations as set forth in the National Institutes of Justice 1999 publication Death Investigation: A Guide for the Scene Investigator (2011 updated version available).

ABMDI was created, designed, and developed by veteran, practicing medicolegal death investigators who were involved in the development of Death Investigation: A Guide for the Scene Investigator. It will also assist the courts and public in evaluating competence of the certified individual.

In 2005, the ABMDI was first accredited by the [Forensic Specialties Accreditation Board](#) and reaccredited in 2010.

The goal of the FSAB is to establish a mechanism whereby the forensic community can assess, recognize and monitor organizations or professional boards that certify individual forensic scientists or other forensic specialists.

Purpose of the American Board of Medicolegal Death Investigators®

- To encourage adherence to high standards of professional practice and ethical conduct when performing medicolegal death investigations.
- To recognize qualified individuals who have voluntarily applied for basic and advanced levels of professional certification.
- To grant and issue certificates to individuals who have demonstrated their mastery of investigational techniques and who have successfully completed rigorous examination of their knowledge and skills in the field of medicolegal death investigation.
- To maintain a listing of individuals granted ABMDI certification.
- To recertify individuals every five years according to established professional recertification criteria, including continuing education requirements and work verification.

Benefits of Certification

Official guidelines for medicolegal death investigators had not been established until publication of the National Guidelines for Death Investigation by the National Institute of Justice in December 1997. Twenty-nine tasks were identified that may need to be performed to properly conduct a medicolegal death investigation. The guidelines were renamed and published in 1999 as Death Investigation: A Guide for the Scene Investigator. These national guidelines were validated by the Technical Working Group for Death Investigation (TWIGDI), the National Medicolegal Review Panel (NMRP) and 146 members of the TWGDI national reviewers' network. Certification provides official recognition by an independent professional certification body that an individual has acquired specialized knowledge and demonstrated proficiency in the standards and practice necessary to properly conduct medicolegal death investigations. The individual agrees to adhere to the highest standards of professional practice and ethical conduct when serving the public and when representing the profession.
