## General Species Information:

### **White Oak**

---

Sunlight: Full sun to partial shade

Soil: Well drained soils, adaptable to sandy or loamy soils

Water: Moderate once established, prefers slightly moist but not wet soils

Mature Height: 60 to 80 feet

Mature Spread: 60 to 80 feet

### **Red Maple**

---

Sunlight: Full sun to partial shade

Soil: Very adaptable, tolerates a wide range from dry uplands to moist soils

Water: Moderate to high, performs well in consistently moist conditions

Mature Height: 40 to 60 feet

Mature Spread: 30 to 50 feet

### **Norway Spruce**

---

Sunlight: Full sun

Soil: Well drained loam or sandy soils, tolerates slightly acidic soils

Water: Moderate, prefers evenly moist soil especially when young

Mature Height: 40 to 60 feet

Mature Spread: 25 to 35 feet

### **River Birch**

---

Sunlight: Full sun to partial shade

Soil: Moist to wet soils, highly tolerant of flooding

Water: High, prefers consistently moist to wet conditions

Mature Height: 40 to 70 feet

Mature Spread: 40 to 60 feet

### **Downy Serviceberry**

---

Sunlight: Full sun to partial shade

Soil: Well drained loam, prefers slightly acidic soils

Water: Moderate, prefers moist but well drained soil

Mature Height: 15 to 25 feet

Mature Spread: 15 to 25 feet
